

## JUDGE BARHORST DOES HIS DUTY TO RHEUMATIC SUFFERERS

If you suffer from Rheumatism and don't read this advice, then the terrible disease must have robbed you of your power to be fair to yourself. Read it: "I, John Barhorst, Justice of the Peace of McLean Township, Ft. Loramie, Ohio, do certify that after treatment by three doctors without result, I have been cured of a very bad case of Rheumatism by using two bottles of RHEUMA. It is now two years since I used the remedy, and I am still as well as ever. Previous to using RHEUMA I was a cripple, walking with crutches, and I feel it my duty to let other sufferers from Rheumatism know what it will do. The result seems almost miraculous to me. I have advised RHEUMA to at least a dozen persons, and each one speaks as highly of it as I. I will answer any one suffering from the disease if a two-cent stamp is enclosed."—May 31, 1912.

You can secure a bottle of RHEUMA for only 50 cents at W. H. Sheldon and he says if not as advertised, money back. It's just as good for Gout, Arthritis, Lumbago and Sciatica.

### GOOD THING FOR THE HENS.

#### Advantages of Connecting Colony Poultry Houses.

By the use of the connecting collar shown in the cut two or more poultry colony houses can be brought together and used for the winter quarters of a flock of thirty-five or more fowls. When used in two or in three an overflow summer house can be connected and used as the feeding and scratching shed. If a third house is used in the series it can be fitted as a laying or a dusting pen. In this way the fowls can be kept in larger flocks, with greater liberty to the individual. Labor is also greatly reduced, inasmuch as only one house instead of two or three need to be visited when feeding, etc. Furthermore, by virtue of the larger number roosting in one pen it will be proportionately warmer.

This connection could be made by a covered wooden passageway as well

as by the galvanized iron collar, as shown in the cut. This collar, however, has a shoulder which aids in keeping out wind and water. The connection should be about three inches above the floor and at least ten inches high and ten inches wide or ten inches in diameter. A sliding trapdoor placed on the inside of the house will confine the fowls in the house when desired and when the houses are disconnected for summer use.

This type of house also has the decided advantage of being large enough to accommodate the chickens during the entire season of growth. Chickens should not be moved from one brooder to another or handled or mixed up if it can possibly be avoided.—Bulletin Department of Poultry Husbandry, New York State College of Agriculture

### LET THERE BE NO WASTE!

Get away from the one crop system. You exhaust your soil and you return little to it by one crop. Rotate your crops. If you cannot do any better let your land lie fallow in turn so that the atmosphere and nature will do what they can to restore its fertility. Cultivate corn more; cultivate rye and oats; cultivate cowpeas and peanuts; cultivate alfalfa and clover and utilize all the products of the farm. Let there be no such thing as waste of byproducts.—Home and Farm.

### Prepare For the Young Pigs.

Know the date when your sows are due to farrow, set it down as something important, then be on the ground on that date, not to fuss and cause disturbance, but quietly to watch and right things if anything needs righting. You may save more money indirectly through this watchfulness than by any other thing in dealing with hogs.

### Indoor Farming.

A few cents will get some hooks to hang the lantern on down at the barn. They are handy and much safer than nails.

A nice new coal scuttle, not too big, is one of the handiest things you ever used for getting grain into bags. Ever try it?

Driving a wedge with the back of the ax has spoiled many a good tool. Take a maul or beetle to do that work and save the ax for its own work.

Clean up and burn all rubbish that would furnish a harboring place for insects and mice. This is especially important with hotbeds and frames.

The cellar is not the best place to keep pumpkins in winter. They are apt to rot there. Put them upstairs and see that they are used before they begin to decay.

One thing to study in the winter is how to keep your land from being washed away by the storms. This hurts land more than all the crops you ever will take from your farm. One good method is to keep washing land well seeded down.—Farm Journal.

## Only One Way to END CATARRH

Reach the raw, tender, inflamed membrane infested with Catarrh germs, and destroy them.

You can't reach the nooks and crevices with liquid preparations—there is only one way—breathe the germ destroying air of Booth's HYOMEI (pronounce it High-o-mei) directly over the inflamed and germ infested membrane.

HYOMEI contains no opium, cocaine or other harmful drugs, it is a balsamic air made of Australian eucalyptus, thymol, and some Listerian antiseptics. It is guaranteed to end the misery of Catarrh and Croup or money back. It's fine for Colds and Coughs.

Ask W. H. Sheldon about Booth's HYOMEI outfit today—it is only \$1.00 and he guarantees it. Extra bottles, if later needed, 50 cents. Just breathe it—no stomach dosing. adv.

## THE THRICE-A-WEEK EDITION

OF THE

NEW YORK WORLD

Practically a Daily at the Price of a Weekly.

No other Newspaper in the world gives so much at so low a price.

This is a time of great events and you will want the news accurately and promptly. The Democrats, for the first time in sixteen years, will have the Presidency and they will also control both branches of Congress. The political news is sure to be of the most absorbing interest.

There is a great war in the Old World, and you may read of the extinction of the vast Turkish Empire in Europe, just as a few years ago you read how Spain lost her last foot of soil in America, after having ruled the empire of half the New World.

The World long since established a record for impartiality, and anybody can afford its Thrice-a-Week edition, which comes every other day in the week, except Sunday. It will be of particular value to you now. The Thrice-a-Week World also abounds in other strong features, serial stories, humor, markets, cartoons; in fact, everything that is to be found in a first class daily.

THE THRICE-A-WEEK WORLD'S regular subscription price is only \$1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and The Middlebury Register together for one year for \$1.65 anywhere in Vermont. The regular subscription price of the two papers is \$2.00.
